WORK EXPERIENCE

Web developer & Content management

winmasters

December 2022 - now

HTML5, CSS, javascript, wordpress, elementor, responsive design, accessibility, jira, photoshop, figma,

- Successfully manage daily content updates and scheduling tasks within the CMS (WordPress), ensuring timely delivery and adherence to deadlines for a high volume of content and ensuring accuracy to maintain website integrity and user experience.
- Develop and implement compelling custom landing pages to support affiliate marketing initiatives and drive customer acquisition. Integrate customizations to enhance visual appeal and attract user engagement.
- Conceptualize, design, and develop custom pages with creative designs to promote specific events and campaigns, aligning with brand guidelines and marketing objectives to maximize impact.
- Follow a mobile-first approach and implement SEO development principles like meta tags, etc. ensuring optimized content for search engines and improved visibility. Consistently follow optimization principles to enhance website performance and user experience.
- Managing additional websites through WordPress and cPanel, ensuring consistent branding, functionality, and user experience across all platforms.
- Working in a team and employing strong organizational skills to prioritize tasks and manage multiple projects simultaneously. Working in constant collaboration with Design and Marketing teams to inform our development process.
- Utilize Jira to track and address bugs, as well as to request features and improvements, effectively communicating with relevant teams to enhance product functionality and user experience.
- Train new team members.
